Attachment 2 Operational Summary April 2011

Material Recover Facility (MRF)

South Bay Recycling (SBR) began operating the Material Recovery Facility (MRF) on April 4, 2011. BHS, the equipment manufacturing company, and SBR worked closely operating the new equipment. During the month, BHS and their contractors worked on system improvements and changes to ensure proper separation of material and processing efficiencies. BHS and their contractors also worked evenings and on the weekends to make specific system changes to the equipment. SBR equipment operators were also trained on the use of the sorting equipment and balers. The new system electronics are very sophisticated and required detailed training and system training. Outbound recyclable material shipment procedures were developed and all forklift drivers were trained on proper loading procedures.

SBR worked with Vocational Rehabilitation Services (VRS) employees to continue their training and specific work assignments. SBR conducted daily meetings with VRS sorters to discuss achievements and areas of improvements from the prior day and focused on specific goals and assignments for the current day. SBR and VRS supervisors worked with VRS sorters on key items for separation in each assigned area.

Transfer Station Operation and Outbound Shipments

SBR continued to make improvements on loading the new trailers and maximizing the outbound loads to each of the facilities including Ox Mountain for MSW, Newby Island and Grover for organic materials, and Zanker Road for construction & demolition material.

Public Recycling Center

Implementation and training of the SBR staff were conducted to ensure a smooth transition with the new design at the Public Recycling Center. Adjusted traffic flow and training of the regular customers were also provided. Customers were encouraged to use reverse vending machines for small volumes of materials.

Maintenance Shop

SBR maintenance staff began to use the newly remodeled maintenance shop.

Notes

- ¹ Self Haul Tons are calculated, as SEC inbound volumes are charged based on inbound yards. The calculated tons are based on outbound transfer tons minus inbound transfer tons, the difference is self-haul tons.
- ² March 2011 shows a negative green waste/organics tonnage number, due to inventory volume not transferred during the reporting period.
